

Gate Instructions

If the gate fails to open when you are exiting the development, you can try this to open the gate:

- 1) Go across the driveway leading to the Siegel's home (803 Camino de las Trampas) and look for the power pole shown in photo "A". It is behind the coyote fence.
- 2) Raise the cover to the circuit breakers shown in photo "B"
- 3) Trip the circuit breaker for the GATE by pulling the bar down
- 4) This will interrupt power to the gate control and the gate should open and stay open.
- 5) Notify Shelli to allow her to call our gate maintenance contractor.
